ADVENTURE

ESLA ADVENTURE

ESLA Adventure is the next generation multipurpose sport kicksled. The aluminium framed sled is designed for dog enthusiasts, ice fishermen and hikers. The solid design means kicking with this model is light, stable and there's plenty of room for hauling your gear.

The suspension in the frame tunes out the unevenness of the terrain, making it safe even at high speed! The suspension can be locked out without tools, so the sled kicks well even where the shock absorption is not needed.

The sled can easily be folded down to a space-saving size for transport or storage, even with the brake and dog equipment installed. It even fits in a ski box! **The folding mechanism** works without tools by loosening the screws and folding the handlebar frame over the runners. The sled can also be locked in this position, which makes lifting and handling easy, even when the sled is folded.

Sliding runners (35 mm) are standard equipment on the Adventure. The basic model is also available with our dog equipment package and additionally a double brake.

TECHNICAL INFORMATION

LENGTH	187 cm (74")
ADJUSTABLE HEIGHT	80–98 cm (31" 38")
WIDTH	40 cm (15")
WEIGHT	12 kg (standard) 26 lb
